## **ACRILEX INTRODUCES ACRIGLAS® MARBLE/GRANITE ACRYLIC SHEETS**

*Natural Stone Patterns Combine Functionality with Attractive Design*

Acrilex, Inc. producers and distributors of high-end custom-colored acrylics, announces its Acriglas® *Marble/Granite* series of acrylic sheets. The acrylic sheets are ideal for point of purchase displays, lighting, signs, furniture, and fixture applications that require complex formed or fabricated shapes. The sheets are also ideal for providing material with superior impact resistance to glass.

Acriglas *Marble/Granite* acrylic sheets offer a rich assortment of natural colors which closely resemble various types of natural stone. Though offered in twelve standard colors, this series may be customized to any color specified and is available with varied degrees of translucency. When combined with a physical surface texture or matte finish, the appearance of honed or mottled stone can be achieved.

Acriglas *Marble/Granite* sheets are lighter in weight and easier to fabricate than stone and glass, and also reduce loss due to breakage, thereby saving both time and money. Specially formulated to resist long-term exposure to UV, *Marble/Granite* sheets will not fade or change color over time like many other plastic products—a very important consideration in permanent fixtures.

Acriglas *Marble/Granite* sheets are available in a variety of sizes, and in thicknesses ranging from 1/8”–1/2.”

### **About Acrilex, Inc.**

Acrilex is a leading producer and distributor of custom-colored and stock plastic, fabricated plastic parts and other products that make people say WOW! In business to provide solutions to clients, Acrilex can design it, create it and get it to you faster than anyone else in the industry. Headquartered in Jersey City, NJ, Acrilex offers a complete line of acrylic products and capabilities. To learn more about Acrilex, call Dan Rustin, a.k.a. Dr. Dan, at 1-800-222-4680, or via email at [drustin@acrilex.com](mailto:drustin@acrilex.com).
